D&T ENGINEERING

General Fabrication

D&T Engineering have worked extensively helping companies and factories to meet all current British legislation and all aspects of health and safety standards. We have worked throughout the food and beverages industries, plastic, health, marine, aviation and leisure industries.

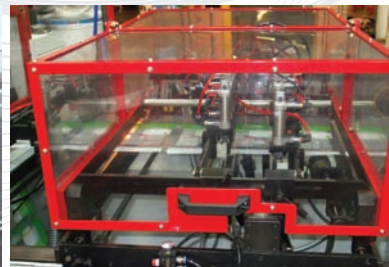

D&T Engineering have designed, manufactured and installed a wide range of items such as, Conveyors, Platforms, Fire Escapes, Staircases, Walkways, Balconies, Railings, Safety Gates, Shelters, Doors, Tanks and Food Processing equipment to name just a few.

We are able to offer all types of pipe work from fabrication to installation. From ABS, PVC & Copper to Screwed and Welded.

Our Capabilities include;

- Shearing
- Folding
- Rolling
- Bending
- Punching
- Drilling
- TIG Welding
- MIG Welding
- MMA Welding
- Laser Cutting
- Plasma Cutting
- Powder Coating
- Galvanizing
- Spraying
- Polishing

So whether you have an idea, a problem that needs a solution, a drawing or clear plans, D&T Engineering can help.

*Not just another fabrication company

D&T ENGINEERING

Bespoke Fabrication

Is there something you want or need but you only have an idea of what it should do or look like?
Or do you have something special in mind that you have a drawing of or even plans for?
Or perhaps even a problem that you need a solution for?

D&T Engineering have been commissioned to design, manufacture and install a wide range of bespoke items. Most recently we have manufactured and installed a disabled hoist at a marina on behalf of Wave 7. The hoist can be seen in action at www.wseven.com.

This is what Wave 7 had to say about us "Wave 7 have used D & T Engineering for a number of years to design, manufacture and install a variety of items. We have found them to be extremely helpful with rapid response times. Most of all every item has been completed to a very high standard." Roger Nadin from Wave 7.

The lorry below has been clad in stainless steel in order to stop the panels rusting when the paint work was chipped. This stopped expensive re-work of these painted panels.

A helicopter lift was designed with a helicopter pilot and manufactured to lift and transport helicopters into and out of their hangers.

D&T Engineering were also commissioned by Hereford Council on behalf of Wyebridge Sports College to design, manufacture and install two shelters to cover the outside seating area and a covered walkway at the college.

Pictures of these projects are below and additional photos along with many more projects can also be seen at www.dandtengineering.co.uk.

So whether you have an idea, a problem that needs a solution, a drawing or clear plans, D&T Engineering can help.

D&T ENGINEERING

Exclusive Furniture

For those who enjoy the finer things in life, D&T Engineering have designed an exclusive range of beautifully handcrafted stainless steel indoor and outdoor furniture.

Our range of benches, chairs, tables and planters will look stunning in any garden or conservatory. As all items are individually handcrafted we are able to adjust the sizes and designs to suit your requirements.

Made out of the highest quality 316 grade of stainless steel it will not rust which makes it ideal in wet climates or in coastal environments. The stainless steel reflects the sun so that it does not get too hot to touch during extreme heat. Your furniture will not fade and will not need any annual maintenance so your furniture will look beautiful all year round without any effort. It will also look just as stunning after 10 years.

The stainless steel can be supplied in highly polished, satin or mill finish. The tables come in stainless steel, with 10mm toughened glass tops, therefore withstanding the toughest of use. The glass colours available are; clear, grey, blue or green.

Our furniture is used at an open exhibit in Brussels (attended by our European party members for Europe) to promote West Midland Business in Europe It looks stunning on the roof top terrace in central Brussels. There are also more photos on our website at www.dandtengineering.co.uk.

Please have a chat with us about your ideas and requirements and we promise to produce your furniture to the highest standards meeting all British and Health and Safety standards.

D&T ENGINEERING

Our Promise to YOU

At D&T Engineering our mission is to supply you with the highest standard of craftsmanship, meeting all British legislation and all Health and Safety standards, with a fast turnaround time at an affordable price.

We are committed to maintaining close liasons with our clients. All our staff including management are highly skilled, fully coded welders and experienced engineers. All the companies welders are coded to BS4872 and are IPAF certified for Powered Access on site.

Take a look at what our customers are saying about us:

We are one of the main sub-contractors to Amey Wye Valley Ltd and this is what they had to say about us: "D&T Engineering is one of our main sub-contractors as their work always meets all British and Health and Safety standards which is crucial to us. D&T Engineering have a fast turn-around time, always deliver on time and to the highest standard. They are competitively priced and are very pleasant to work with. We value this working relationship, long may it continue."

We also work closely with WorthEngineering and this is what Phil Worthing had to say about us: "WorthEngineering has been working in partnership with D&T Engineering for many years on various design, manufacture and installation projects. They are a partner with great integrity that we trust and can rely on." Phil Worthing of WorthEngineering

This is from an end user customer " D&T Engineering helped us to design a balcony with an outside staircase leading up to it, along with garden railings and a gate. They then manufactured and installed everything. All I can say is that the whole experience was GREAT! The project was very competitively priced, it was completed in a very timely manner and we are still very happy with the results many years later. "
